About GRENA

GRENA was founded in 1999 for the development of Information Technologies (IT) in education and research field. The founders of association GRENA are five major universities, Georgian National Academy of Science and Open Society-Georgia Foundation.

Main fields of GRENA's activities are:

1. Providing IT services to users and implementation of new, innovative services
2. IT education
3. Preparation and Implementation of research and technology projects
4. Providing software products and cyber security solutions to customers
5. Promoting and supporting IT development in Georgia

Marketing Activities – New LOGO

Cyber-lab.tech Portal

- Cyber-lab.tech portal was created in cooperation with CERT.GOV.GE – with support of EaPConnect project
- This portal is mainly intended for Georgian university students who are studying IT, in order for them to expand their practical skills in detecting and responding to cyber incidents
- Facebook page/event and shared it on CERT.GOV.GE and GRENA facebook pages/marketing materials
- Invitations were sent almost to all universities, public and private sectors (to IT and marketing departments)
