Your password changed

Your Microsoft account passwrd was changed.

If this was you, then you can safely ignore this email.

Security info used:
Country/region: United States
Platform: iOS
Browser: Safari
IP address: 77.196.86.10

If this wasn't you, your account has been compromised. Pleas follow IMMEDIATELY:

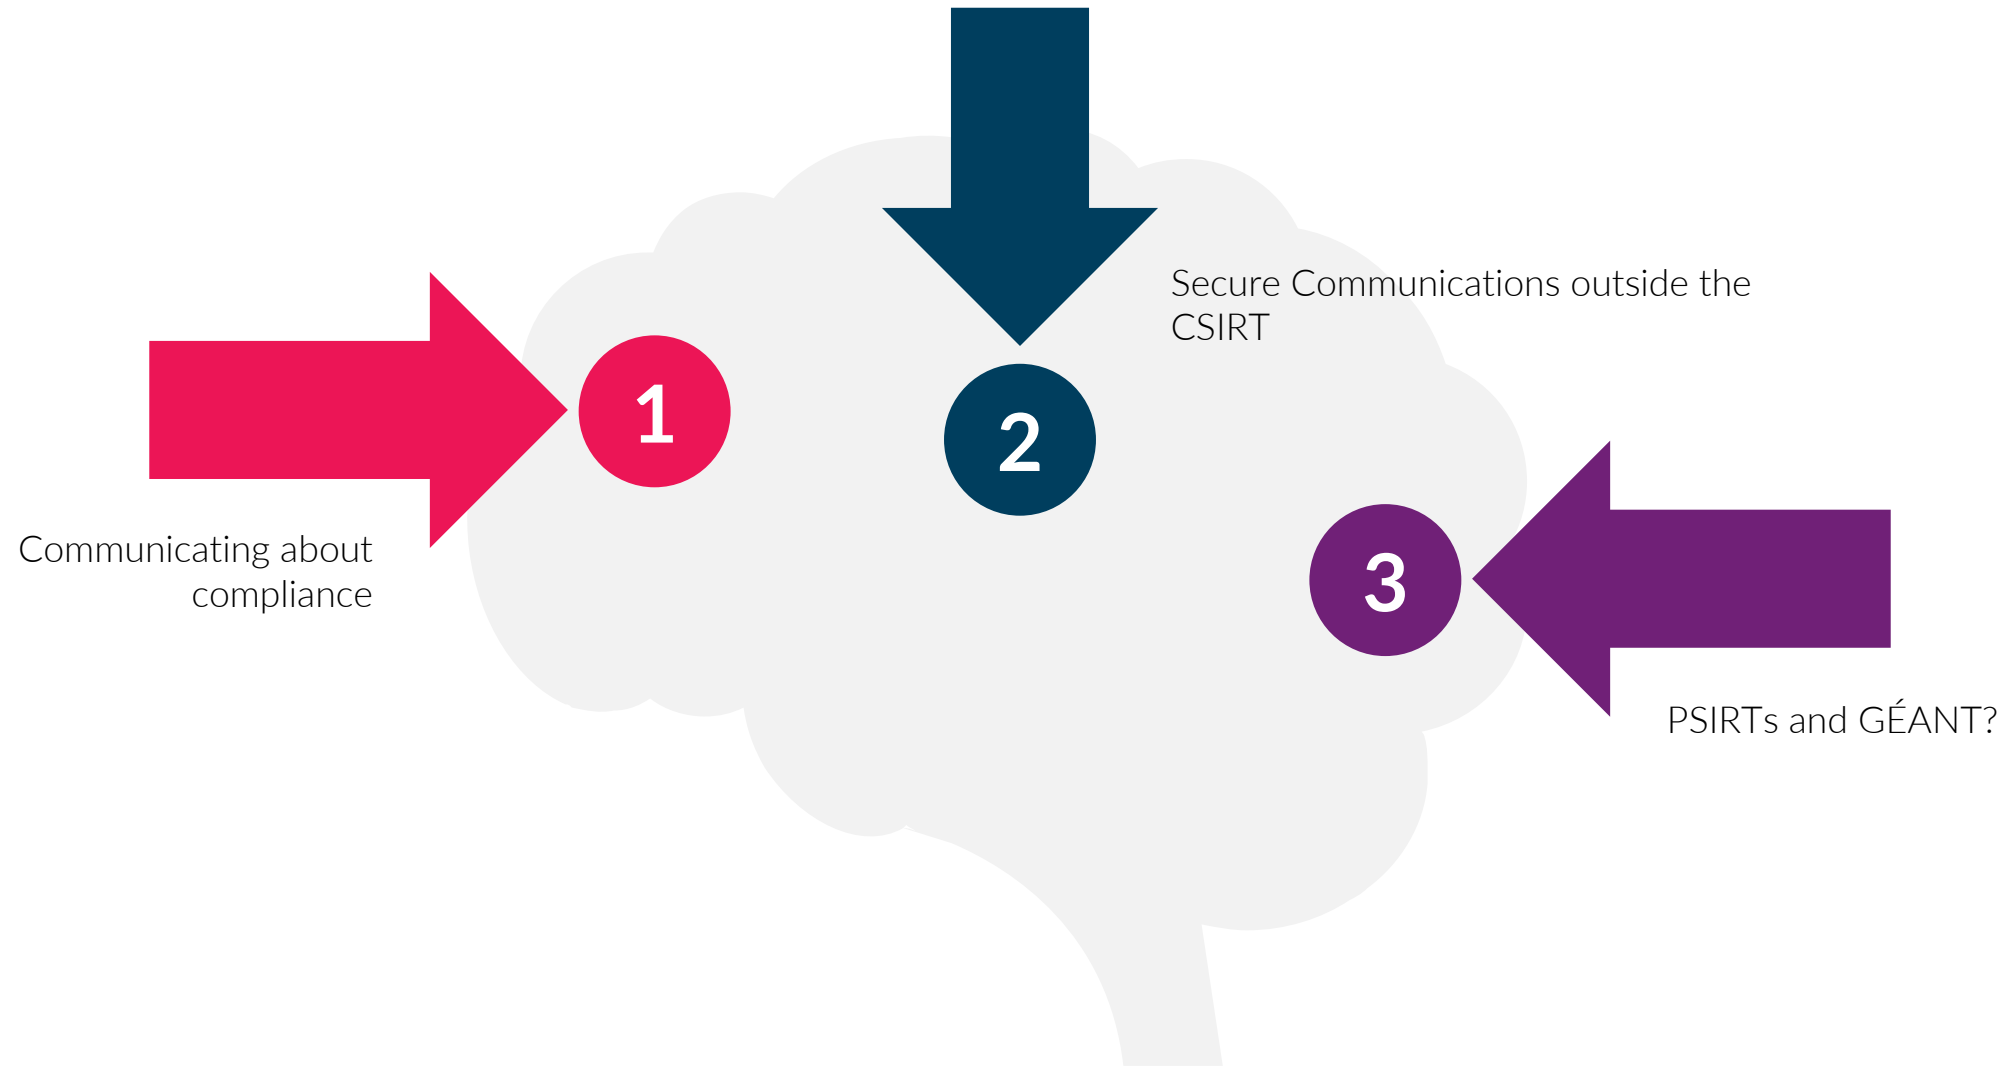

1. Reset your password.
2. Review your security info.
3. Learn how to make your account more secure.

You can also [opt out](#) or change where you receive security notifications.

Thanks,

The Microsoft account team

Secure Communications

- **TLP CLEAR**
Unlimited – no restrictions
- **TLP GREEN**
Community-wide, not public
- **TLP AMBER**
In-house (organization + clients), need-to-know distribution
- **TLP AMBER+STRICT**
In-house (organization ONLY), need-to-know distribution
- **TLP RED**
Personal, for named! recipients! only!

More information: <https://www.first.org/tlp>

What problems might exist with using either of the standards for secure communication presented here (NDA / TLP / Classification)?

Discussion 8: Managing Vulnerabilities

- Two weeks ago someone report a vulnerability in your web application
- He used the main E-Mail Address of the organization
- He accessed details of customers by careful choice of URL
- Evidence was a screenshot
- E-Mail routed to corporate lawyers, who threatening to report to the police
- What legal issues arise?
- How could they been avoided?

Thank You
