eduTEAMs

Niels van Dijk
Technical Product Manager
Groups for international collaboration

- Federated Identity is available to support distributed authentication for Services
- Collaboration scenarios need Authorization based on groups and roles need to be distributed as well
- Groups exist as either short lived or more permanent (institutional) groups
- Group membership information is needed at logon, but also later on, out-of-band
- Nothing exists to support groups for international collaboration
Functionality:
- Create and manage teams
- Supported roles: admin, manager, member
- View, modify or revoke group memberships
- Guests cannot be group admin
- Two ‘admins’ per team can be selected

- Any enduser can be a team ‘admin’, if IdP is in eduGAIN
- Team members are invited via email; accept with login through eduGAIN IdP or OpenIdP ‘guest’
eduTEAMs for Endusers

Privacy considerations:
- Consent is required before joining a team
  - Name & email will be visible to team members
  - Group membership will be shared to SP
- Team admin selects which SPs are able to query group membership data for the team
- Only group memberships and roles are delivered; no additional attributes
- Data stored under Dutch data protection Laws
Functionality:
- Provide group membership(s) on a per user basis
- SAML AA and Oauth2 based VOOT APIs available
- Selfregister if metadata already in eduGAIN

Privacy considerations:
- SP must have prior knowledge of user (ePPN)
- Team admin selects which SP is able to query group membership data for a user of this team
- Only group membership and roles are delivered; no additional attributes
eduTEAMs for Identity Providers

Functionality:
- Any eduGAIN IdP is allowed by default
- eduTEAMs SP requires name, email and ePPN
- eduTEAMs SP supports REFEDs R&S category

Privacy considerations:
- SPs only get Group membership, other attributes via IdP
- Supports eduGAIN Code of Conduct
- Data stored under Dutch data protection Laws
Service:
- Available from Jan 2015 as public beta
- Documentation - real soon now

Future Features:
- Accept additional Guest IdPs through REEP
- Allow other (VO) Group providers to connect

Operations:
- Move out of beta if enough interest
- Move into GEANT?
