

# GTS Version 6 Release Notes

---

## Platform Upgrades

- The GTS code base now runs on Java 8 and Apache Karaf 4.
- The GTS GUI now runs on Spring 4.

## API Changes

- A new API for SDPs and STPs is now available for operators.
  - See documentation for usage details.

## GUI Changes

- Testbed import now supports the .groovy file type, in addition to .dsl.
- Testbed export now uses .groovy.
- Added missing project name to some notification mail.
- Added missing project name to project deletion confirmation popup.
- Added a link to our Privacy Policy to all GUI pages.

## Performance and Fixes

- Fixed an issue with errors not being displayed with the right color in GUI.
- Fixed GUI and backend not having the same validation criteria on some fields.
- Fixed a concurrency related problem during testbed reservation.
- Fixed an issue with passwords not being stored properly.
- Fixed a concurrency related issue with releasing BMS.
- Fixed an issue with user password authenticator initialization.
- Improved performance of BMS configuration update.

At present docker images for deploying GTS version 6 are not available.
