

Fast, Simple, Secure

A real-time, digital alternative for online student discount

InAcademia provides merchants with an instant, secure and reliable way to validate academic affiliation

End users authenticate via their home institutions login, creating familiarity and trust

It preserves user privacy and reduces the collection of personal data, helping with GDPR

How it works

InAcademia uses a simple OIDC API to connect merchants to an international network of SAML-based academic identity providers.

The merchant redirects the student via the API, the student is validated by their home institution and the result returned back to the merchant's site.

InAcademia provides secure, privacy preserving validation

User data is not shared

Leveraging eduGAIN

Used and trusted by thousands of institutions worldwide

Real-time affiliation check

Uses federated institution directories
