

WP7. Pilot coordination and continuous risk assessment

Michał Zimniewicz PSNC

Up2U Final All Hands 14th May 2020

Definitions

- Pilot students and teachers using the Up2U Application Toolbox to bridge the gap between secondary and higher education
- ◆CPD
 - Module 1 (training), Module 2 (students), Module 3 (cascade training)
- Pilot coordination Administration of CPD, pilot activities and e-infrastructures
 - Not integrating and fixing software
 - Not designing use cases
 - Not evaluating pilots

Final demonstration and report on large-scale pilots

Table of contents:

- 1. Pilot coordination
- 2. Pedagogical evaluation of pilots
- 3. Feedback on platform improvements
- 4. Quality assurance
- 5. Risk assessment

- Pilots in numbers
- Engagement of schools
- Pilot platforms and collecting data
- Drop-out among teachers
- Main challenges in pilots
- Observed strengths

Official KPI: 1 000

Engagement of schools (1)

Engagement Strategy	Germany	Greece	Hungary	Italy	Lithuania	Poland	Portugal	Spain
Government agencies								
Accreditation for CPD								
CPD Modules as incentive								
National events and conferences								
Competitions for students								
Invitations through communities and national organizations								
Letter of support from the EC								

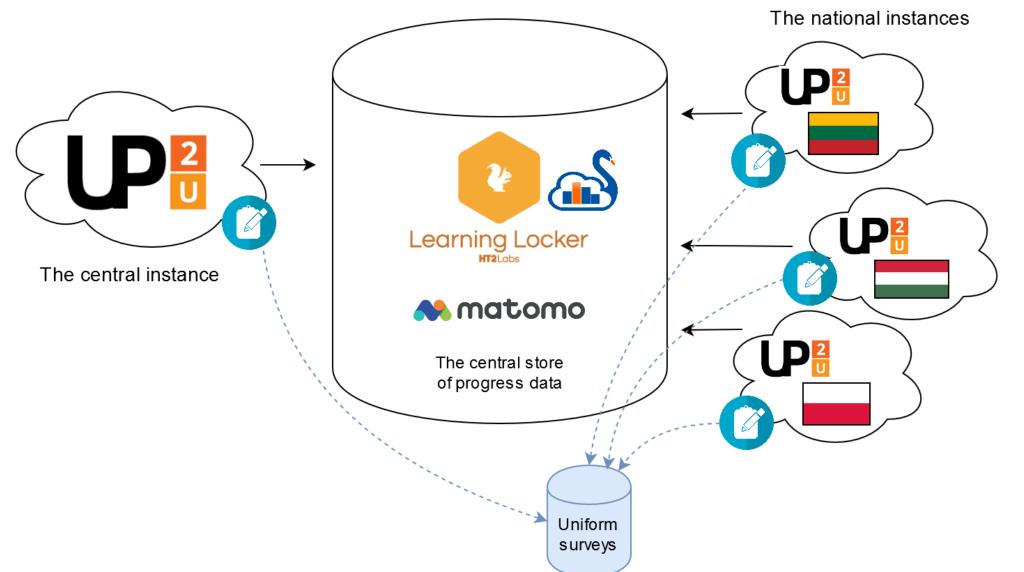

Engagement of schools (2)

Engagement Strategy	Germany	Greece	Hungary	Italy	Lithuania	Poland	Portugal	Spain
Social media activities								
National SMC to disseminate Up2U								
National SMC to work in classrooms								
Visiting schools								
Existing contacts								
A microsite or a national instance								
Webinars								
Creating unique courses								

Pilot platforms and collecting data

Feedback collected on the reasons. Mitigation actions adopted.

Example reasons:

- Teachers not willing to create new materials (time constraints)
- Inadequate ICT equipment at schools
- Tools not easy to use, weak user experience
- Partially-missing translations to national languages
- No information (at that time) about sustainability

- Convince teachers to adopt modern technology
- Fear of technical problems that might occur in the classroom
- Extra effort from teachers to transform their teaching proces

- Competitive solutions
- Limited project's capacity for software development

- Support offered by project partners
- Technological solutions, previously not so popular in high schools (e.g. H5P, Jupyter)
- Effective learning materials and interesting subjects attract more users than software offering only
- National Up2U instances made easier to provide user support and sustainability strategies

THANK YOU FOR YOUR ATTENTION!
