EduID in 2020

And then: COVID19 …

Other Priorities

No international conferences

SURF

What's next ?

Continue to exchange knowledge and experiences between the initiatives.

EduID is a means, not an end. Enabling educational services is the goal

The 'gap' between the Trust & Identity people working on eduIDs and the people working on the development of educational services.

There is no natural overlap between these two groups

How can we organise this further?
