# Terminology and Glossary

## OAV Terminology

Creado por Susanne Nägele-Jackson, actualizado por última vez el sep 03, 2025 • 32 min de lectura

### Terminology and Glossary

During our discussions with NRENs and at workshops it became clear that there are OAV terms that are being used in different ways and in some cases with slightly different meaning and understanding. So in order to have a common basis we decided to identify a list of relevant OAV terms and add a short definition with a reference link (source) for each term as well as an acronym table with definitions of abbreviations. We tried to use standard-based definitions whenever we could find them and listed internal definitions in cases where no standard definitions were found.

Internal definitions are based on the consensus of all team members; to come to an agreed definition of all team members a terminology document was created with descriptions of the terms and an internal survey was conducted for final adjustments. Additional comments are welcome!

### OAV Common Terms

**A B C D E F G H I J K L M N O P Q R S T U V W X Y Z**

### Glossary

OAV Terms	Definition and reference
<b>AIOps</b>	<b><i>AIOps is (the usage of) Artificial Intelligence for IT Operations. It combines big data and machine learning to automate IT operations processes, including event correlation, anomaly detection and causality determination.</i></b> <ul style="list-style-type: none"> <li><a href="https://www.gartner.com/en/information-technology/glossary/aiops-artificial-intelligence-operations">https://www.gartner.com/en/information-technology/glossary/aiops-artificial-intelligence-operations</a></li> </ul>
<b>Adaptive Machine Learning</b>	<b><i>Adaptive machine learning builds on traditional machine learning to create a more advanced solution to real-time environments with variable data. As its name suggests, adaptive machine learning can adapt to rapidly changing data sets, making it more applicable to real-world situations.</i></b> <ul style="list-style-type: none"> <li>Reference(s) or Source: <a href="https://www.encora.com/insights/machine-learning-what-is-adaptive-ml">https://www.encora.com/insights/machine-learning-what-is-adaptive-ml</a></li> </ul>
<b>Adversarial AI/ML</b>	<b><i>A practice concerned with the design of ML algorithms that can resist security challenges, the study of the capabilities of attackers, and the understanding of attack consequences.</i></b> <ul style="list-style-type: none"> <li>Reference(s) or Source: "The Language of Trustworthy AI: An In-Depth Glossary of Terms (updated August 4, 2024)" (<a href="https://docs.google.com/spreadsheets/d/e/2PACX-1vTRBYglcOtgaMrdf11aFxFEY3EmB31zslYI4q2_7ZZ8z_1IKm7OHTF0t4xlscuogNZ3hrZAaDQuv_K/pubhtml">https://docs.google.com/spreadsheets/d/e/2PACX-1vTRBYglcOtgaMrdf11aFxFEY3EmB31zslYI4q2_7ZZ8z_1IKm7OHTF0t4xlscuogNZ3hrZAaDQuv_K/pubhtml</a>) NIST(Reznik_Leon)</li> </ul>
<b>AI Accuracy</b>	<b><i>Closeness of computations or estimates to the exact or true values that the statistics were intended to measure.</i></b> <ul style="list-style-type: none"> <li>Reference(s) or Source: "The Language of Trustworthy AI: An In-Depth Glossary of Terms (Updated August4, 2024)" (<a href="https://docs.google.com/spreadsheets/d/e/2PACX-1vTRBYglcOtgaMrdf11aFxFEY3EmB31zslYI4q2_7ZZ8z_1IKm7OHTF0t4xlscuogNZ3hrZAaDQuv_K/pubhtml">https://docs.google.com/spreadsheets/d/e/2PACX-1vTRBYglcOtgaMrdf11aFxFEY3EmB31zslYI4q2_7ZZ8z_1IKm7OHTF0t4xlscuogNZ3hrZAaDQuv_K/pubhtml</a>) (<a href="https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.100-3.pdf">https://nvlpubs.nist.gov/nistpubs/ai/NIST.AI.100-3.pdf</a>)</li> </ul>
<b>AI Agent</b>	<b><i>An artificial intelligence (AI) agent is a software program that can interact with its environment, collect data, and use the data to perform self-determined</i></b>

## Network eAcademy Working Group in GNA-G

Make the current contents and tools of the Network eAcademy **available to the entire research and education community** and known through meetings, GNA-G community VCs and side meetings.

Be a tool for Research and Education institutions around the world to help them **check their maturity status and compare their architecture** in Orchestration, Automation and Virtualisation with other sibling organisations.

Be a **platform for knowledge sharing and discussion** to improve the content of the Network eAcademy, in the areas of Automation, Artificial Intelligence, Quantum Technologies, and other Network Development areas.

## What Can You Do?

- Follow the training tracks:  
<https://wiki.geant.org/spaces/NETDEV/pages/870744119/Network+eAcademy+Training+Portal>
- Map your Architecture. Templates and examples here:  
<https://wiki.geant.org/spaces/NETDEV/pages/362742030/Mapping+Use+Cases>
- Do a self-assessment through the OAV Maturity Model:  
<https://wiki.geant.org/spaces/NETDEV/pages/543752253/OAV+Maturity+Model>
- Send us your examples for the Community Portal:  
<https://wiki.geant.org/spaces/NETDEV/pages/212303927/OAV+Community+Portal>
- See the Terminology and Glossary:  
<https://wiki.geant.org/spaces/NETDEV/pages/212303919/OAV+Terminology>
- Subscribe to the mailing list for the Network eAcademy Working Group at  
<https://lists.gna-g.net/postorius/lists/network-eacademy-wg.lists.gna-g.net/>
- Contact us to share your ideas/suggestions: [network-eacademy@lists.geant.org](mailto:network-eacademy@lists.geant.org)

**Thank You!**
