

Boost your Digital Transformation with the OAV Maturity Model

Is your organisation willing to go to the next step in automation? Not sure about which areas you should focus on to advance in digital transformation? **The OAV Maturity Model**, crafted by the GN5-2 **Network eAcademy** team, is here to help you!

What is the OAV Maturity Model?

OAV stands for Orchestration, Automation and Virtualisation, the 3 pillars for digital transformation. The OAV maturity model is an instrument to evaluate your current position in OAV and provide indications of how your organisation can transform and improve. It contains graphs to compare each sub-dimension with the average.

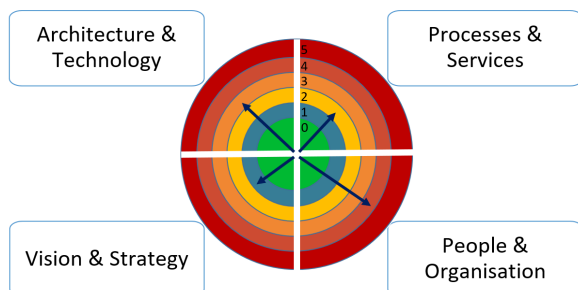

In the image over on the right, you'll find an example for Architecture and Technology sub-dimensions. In this case, for instance, the organisation might choose to put more effort in modelling abstractions, as it is the only sub-dimensions where it is below average.

What Will You Get?

By fulfilling with the OAV Maturity Model, your organisation will get a confidential report with:

- A clear view of **your current maturity** in 31 sub-dimensions across **four key areas**:
- Your **maturity level** for each **sub-dimension and globally**, in 6 stages:

- Tailored recommendations.
- Insights to guide training and investment decisions.

What's New?

The latest iteration of the OAV Maturity Model includes:

- **Colour-coded answers** that are aligned with maturity stages, making it easy to visualise your organisation's current position and progress.
- **Easier navigation and improved accessibility** features to enhance the overall user experience.

Ready to Get Started?

Embark on your digital transformation journey today. Take the self-assessment survey to receive a personalised report that will help you transform your network and empower your team.
