2022 Update

Latest developments and news

Antoine Delvaux ▪ PSNC / GÉANT project ▪ antoine.delvaux@man.poznan.pl

3rd European perfSONAR User Workshop

24-25 May 2022

perfSONAR is developed by a partnership of

ESnet

INDIANA UNIVERSITY

A quick look back...

... Zoom, April 2021

2nd European perfSONAR Users Workshop

- Online (Zoom) in April 2021, hosted by GÉANT
- 15 presentations from 11 organisations
- Around 70 participants in total

You asked for:

- Continued OS support
- Easier access to data
- Improve documentation and guides
- And more...

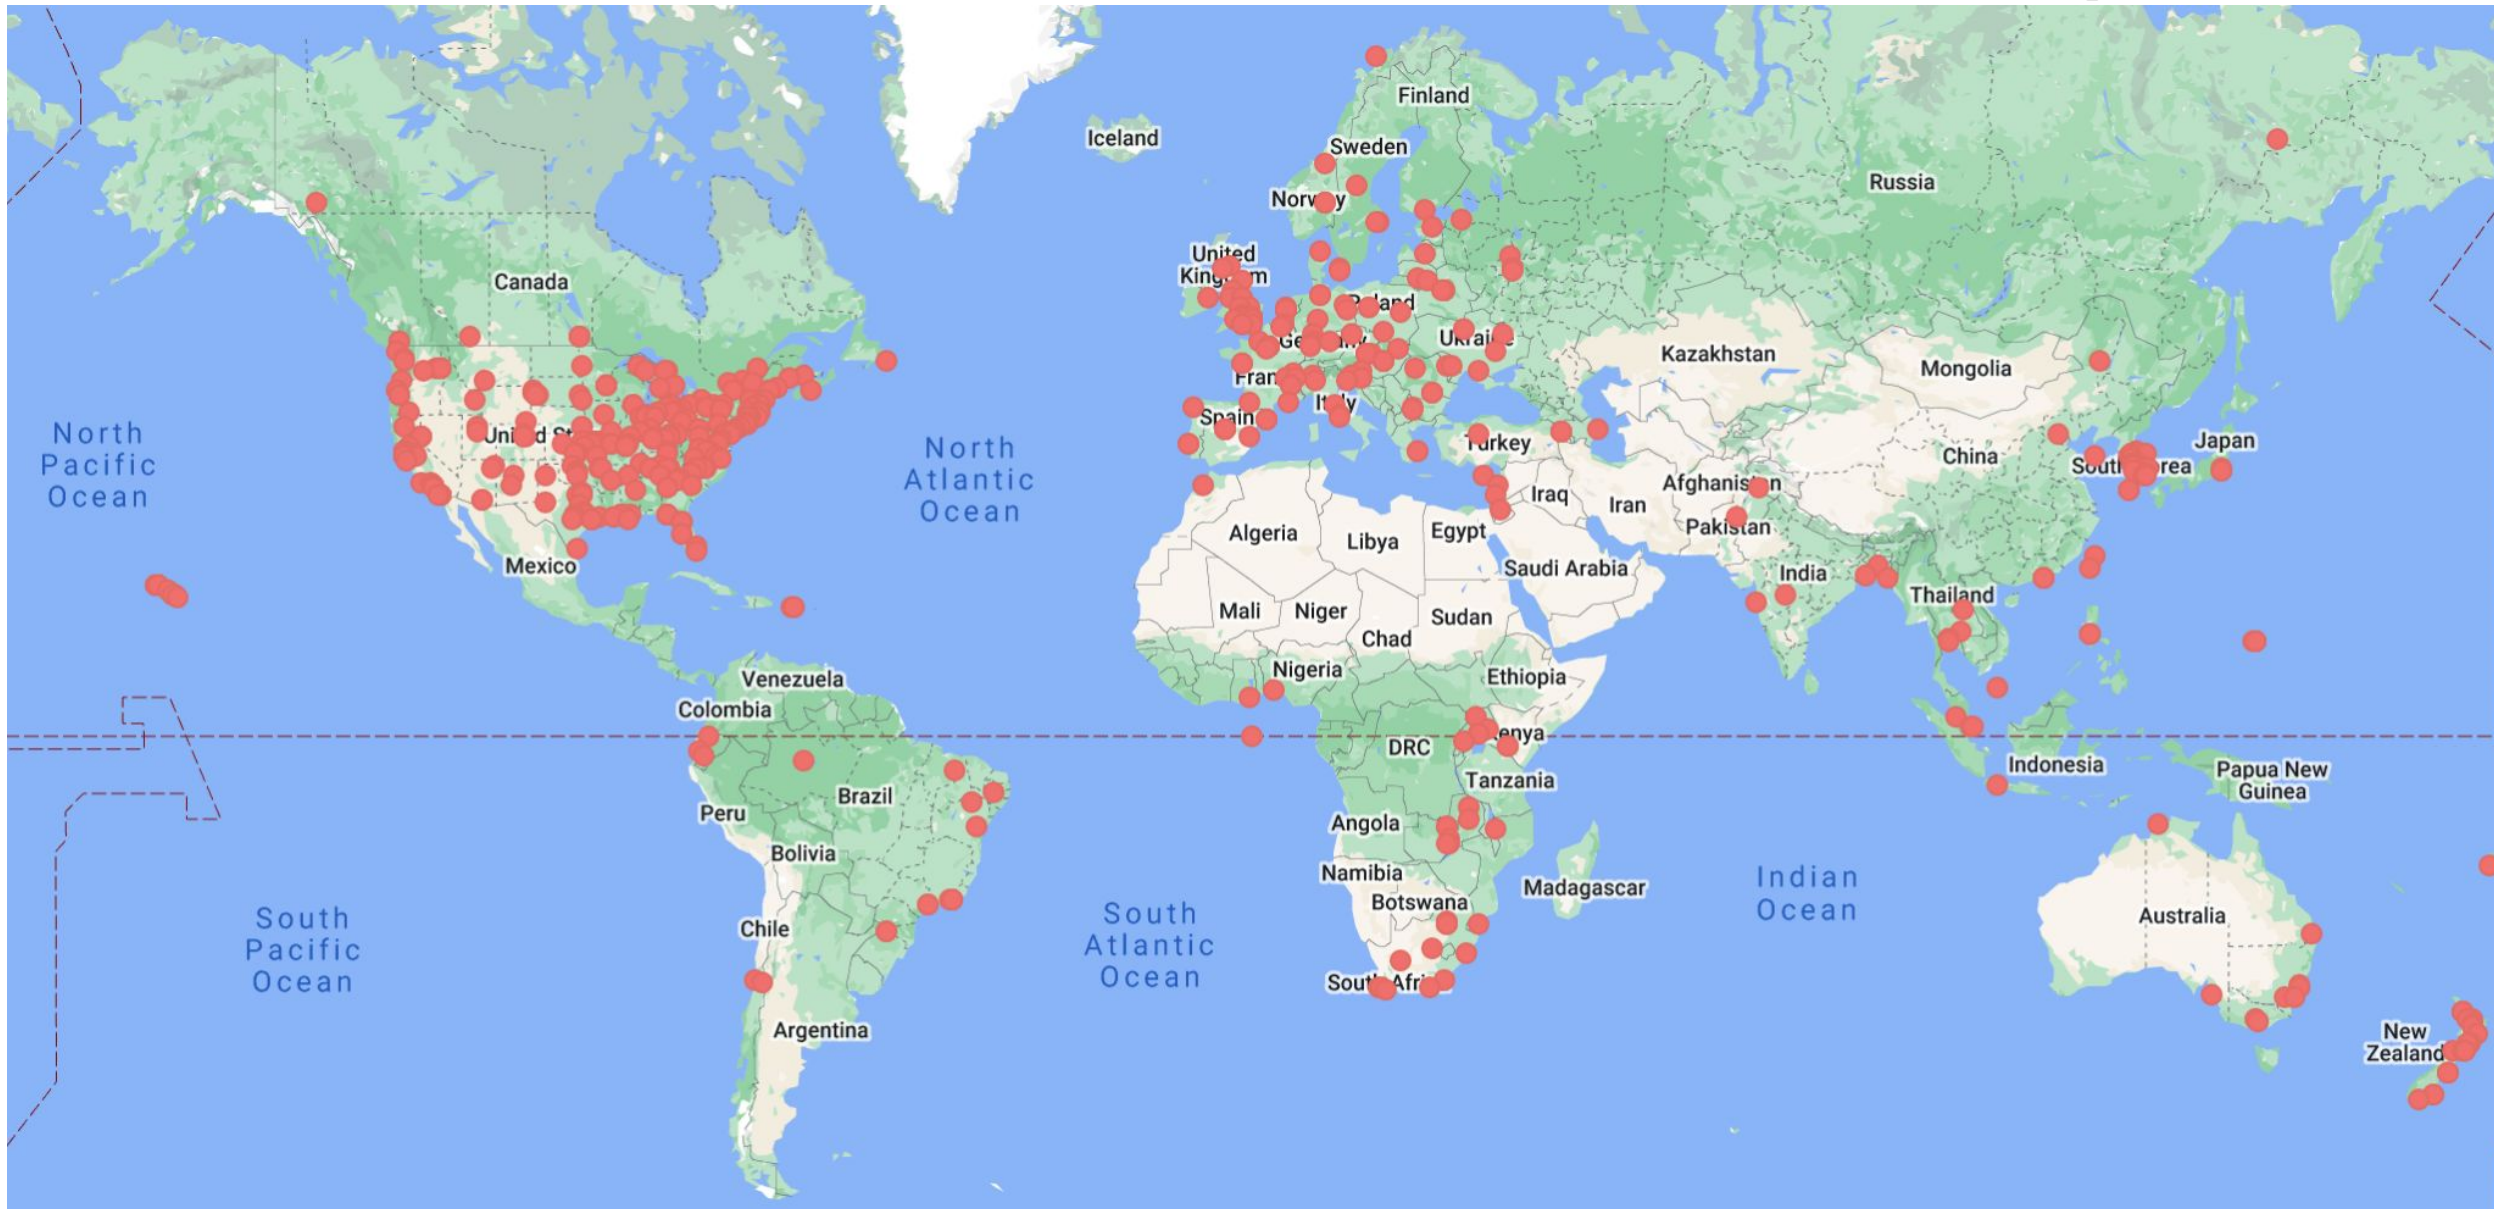

What happened since then?

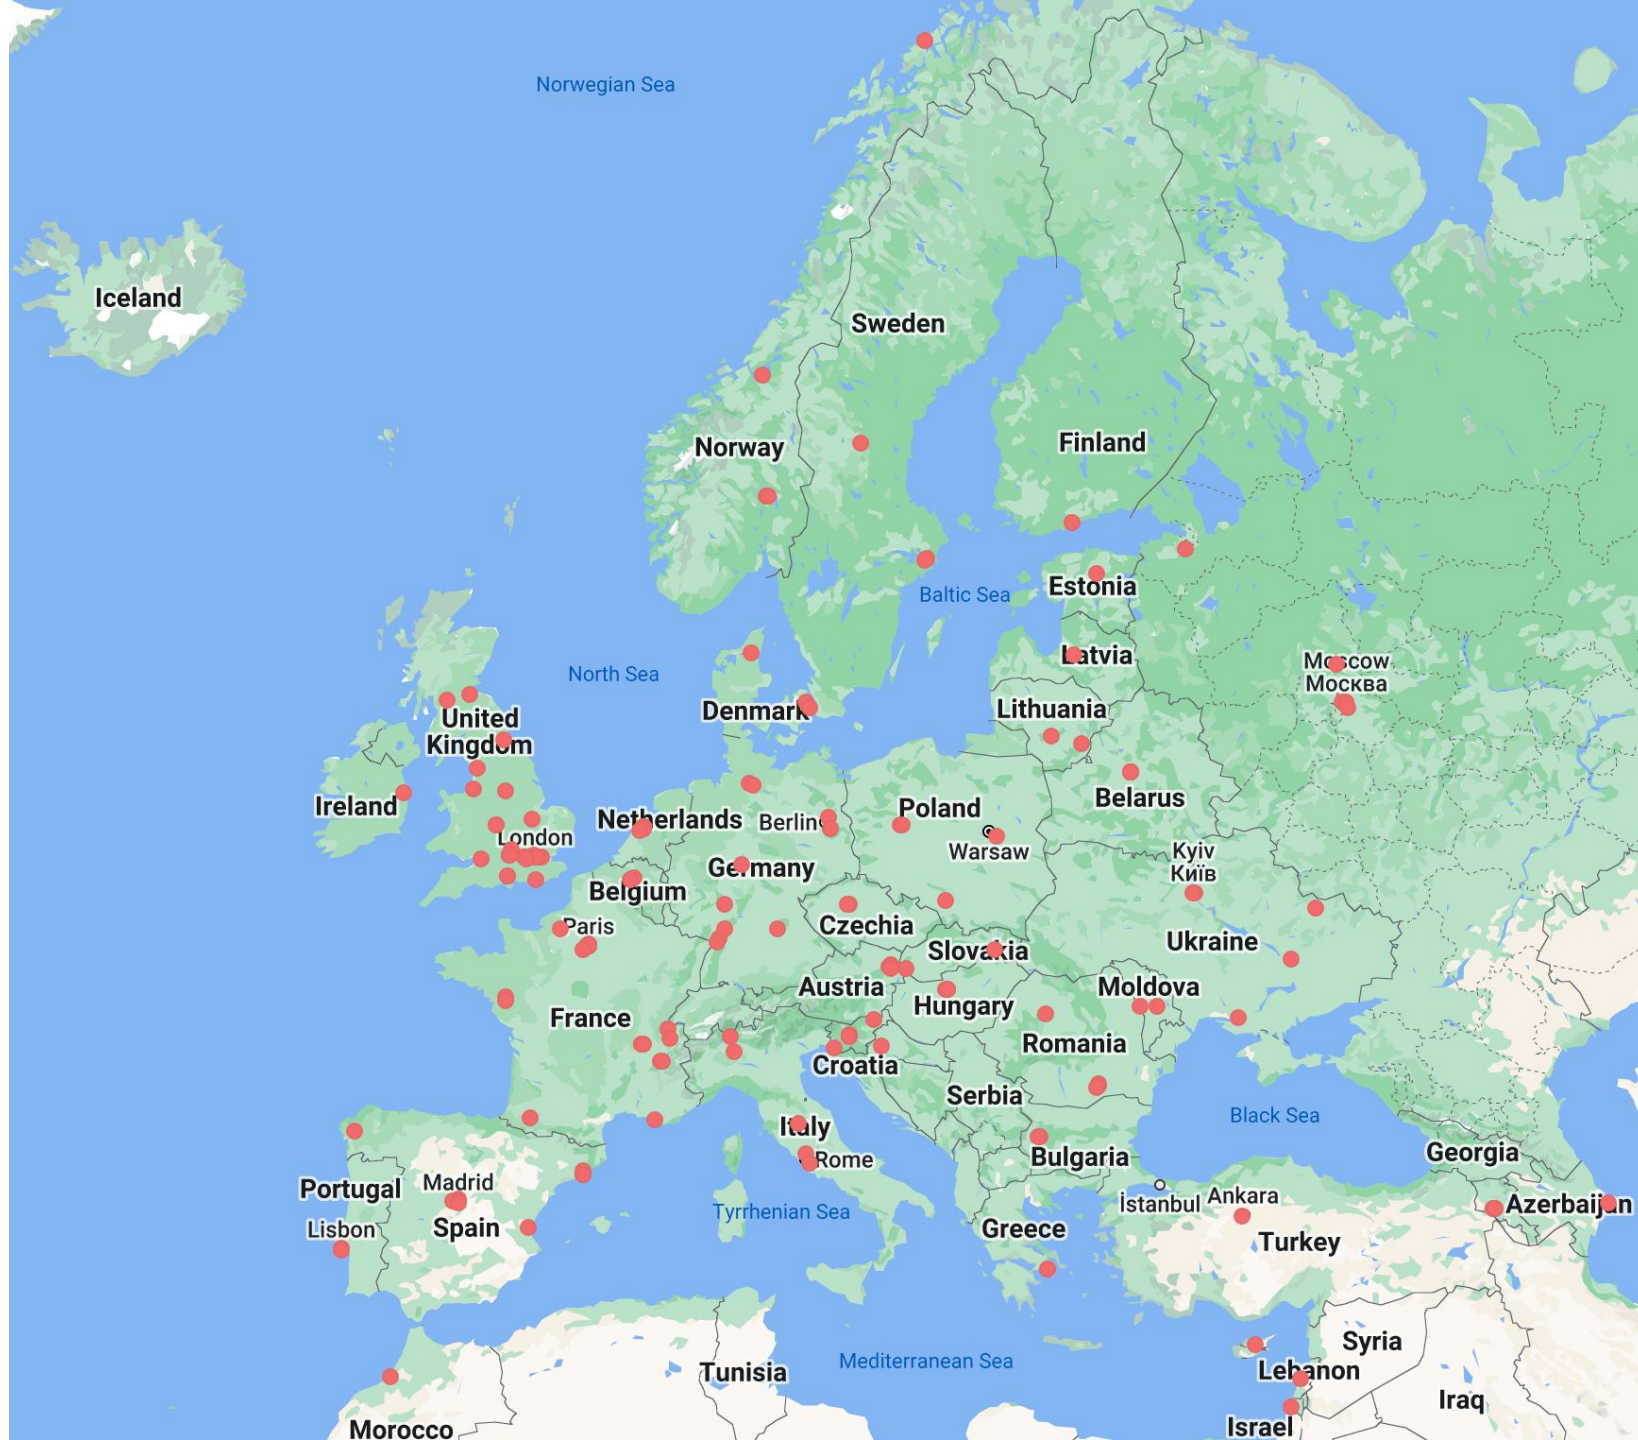

- New maintenance releases
 - 4.4.0 to 4.4.4
- 2nd perfSONAR day hosted by Internet2 in November 2021
- No 5.0-beta release ...
 - ... yet
- But working on it
 - Lots of discussion, meetings, calls ...
 - ... and clearly some development work!

Deployments update

Around 2000 public nodes around the world

Software update

Latest releases

perfSONAR 4.4.0 - 4.4.4

- A few minor new features:
 - Loopback throughput tests
 - AS numbers lookup in pScheduler limits
 - Graphs Archive Whitelist
 - New RabbitMQ archiver
- Bug and security fixes when required

Thank you for your reports!

2nd European pS Users Workshop

Online, April 2021

2nd European perfSONAR Users Workshop

We discussed:

- perfSONAR installations and usage
 - From 10Gbps mobile testing to scaling up a pS deployment
 - From Central Management server setup to CNaaS deployment
- New tools and usage
- pScheduler plugins development
- OS Support

Addressing your requests

- ✓ No OS lock-in
- ✓ Continue Ubuntu support
- ✓ Different architectures
- ✗ Stay near the edge instead of well behind
- ✓ Scriptable configuration
- ✓ Containerisation
- ✓ Simple installs
- ✓ And even simpler for on-demand testing
- ✓ Easy export of measurement data

Improved OS Support

Continued Ansible Support
Continued Docker Support

Upcoming 5.0 release

OS Support

- Workshop poll and follow up discussions
- Long term need to move away from CentOS, and go towards:
 - Rocky / Alma Linux
 - Debian / Ubuntu
- Continue looking at CentOS / RedHat evolution

OS Support: What happened so far?

- Discontinued Ubuntu 16
- Unfortunately no Ubuntu 20 support yet
- Continued investigation
- Porting code with a new unified build mechanism
 - Unibuild

Unibuild

- Create a unified setup to build any perfSONAR repository
 - Support both RPM and Deb formats
 - OS aware (builds, dependencies, ...)
 - Snapshot and release builds
- Initially developed for pScheduler builds
 - Then generalised for the other perfSONAR repositories
 - Currently being integrated in the general build process
- Then using Docker and QEMU to build for different architectures

Upcoming 5.0 Release

- New backend: OpenSearch
- Middleware to transition: Elmond
- Opening up possibilities
 - Easier access to data
 - Different displays
 - Correlations with other data sources

psGUI: on-demand measurements

- Help network engineers work with pScheduler / perfSONAR

Create a GUI...

...To do perfSONAR On-Demand measurements

psGUI: 1st implementation

- Source and destination from a MaDDash grid
- Most used measurement types:
 - Latency
 - Throughput
 - Trace
 - RTT
- To enter public beta soon, stay tuned!

Nodes

Source:

Croatia - psmall.st.carnet.hr

Toggle choices

Destination:

Belgium - perfsonar.r2.brudie.belnet.net

Test parameters

Test:

throughput

IPv4

IPv6

TCP

Test duration:

10

Total runtime of test in seconds (1 - 1000)

Advanced parameters

Submit

throughput: ps02.aco.net -> psmall.st.carnet.hr (iperf3)

<https://ps02.aco.net/pscheduler/tasks/c5301e91-66a7-45aa-a3f9-760adb65e633/runs/first>

latency: ps02.aco.net -> psmall.st.carnet.hr (100 packets)

<https://ps02.aco.net/pscheduler/tasks/a9df94db-3616-4544-96c8-81b680560273/runs/first>

psGUI: 1st implementation

- Source and destination from a MaDDash grid
- Most used measurement types:
 - Latency
 - Throughput
 - Trace
 - RTT
- To enter public beta soon, stay tuned!

Tracking progress and engagement

- Issue tracker
 - <https://github.com/perfsonar/>
 - Add your own bug report or feature request
- User lists reports and discussions
- Dev meetings and standups
 - Bi-weekly standups, weekly QA call, weekly automation and containers call
 - Fortnightly 1 hour open Dev call alternating with Docs & Training call
 - Yearly Developers meeting
- perfSONAR day, Workshops, Infoshares, Conferences

3rd European perfSONAR Users Workshop

- 1st day: Users experience, use cases
- 2nd day: Developers corner, new features, work in progress
