Agenda

• GÉANT
• GÉANT Network
• GÉANT Trust and Identity Services
A membership Association for Europe’s National Research & Education Networks (NRENs)
GÉANT Association

Coordinates and participates in EC-funded projects
Under Horizon 2020 the financial instrument for implementing the Innovation Union, a Europe 2020 flagship initiative aimed at securing Europe's global competitiveness

Operates a pan-European e-infrastructure with connections to all regions of the world
GÉANT network

Manages a portfolio of services for research & education
EduX

Organises and runs community events & working groups
TNC, task forces & special interest groups
GÉANT membership

GÉANT Trust & Identity services
Protecting privacy and enabling secure access to services

Secure global roaming WiFi access service, available in 100+ territories

Inter-connects identity federations around the world, simplifying access to content, services and resources ~ 3500 identity providers accessing services

Lightweight student validation service, protecting student privacy

Making managing virtual teams easy
https://www.eduroam.org/
eduroam
Linking global R&E community

Secure global roaming infrastructure for research and education: users authenticate locally and get online in eduroam-enabled locations

Global service across 100+ territories

More than 3 billion international authentications and counting

A worldwide success story
eduroam has been an amazing success story and an example of research and education collaboration

eduroam.org  @eduroam
Hierarchical RADIUS-based authentication infrastructure
eduroam monitor and database
Monitor the status of the RADIUS servers and related infrastructure

The inter-federation service

**eduGAIN** inter-connects Identity Federations enabling Identity Providers and Service Providers of different federations to authenticate users worldwide:

- Expands the user base to tens of millions
- Enables national service providers to offer their service worldwide without per-county agreements
- Enables secure Single Sign On services to global research and educational resources

---

**March 2021:**

- 71 Active Federations
- 7 Candidate Federations
- 7417 entities

---

Components
- Proxy & Identity Hub
- Membership Management service
- Discovery Service
- Metadata Service
- Second Factor Authentication (Pilot!)

Characteristics
- Full implementation AARC Blueprint Architecture
- Single- and multi-tenant options
- Sustainability and strategic partnerships

A service to enable use of federated identity management in research & academic collaborations

Partner for any e-Infra or Research Infra including “long tail”, informal groups

A service to enable use of federated identity management in research & academic collaborations

Partner for any e-Infra or Research Infra including “long tail”, informal groups

https://www.eduteams.org
• Users sign into services with their **community identity** via eduTEAMS

• Users **register once and access any service** (available to their community)

• Reduces complexity for Service Providers by providing **one integration point for all services**

• **Integration with GÉANT, EOSC and other communities and/or eduGAIN services**
European Open Science Cloud
What is InAcademia?

• Service to validate whether an end user is affiliated with academia

  The real-time, digital equivalent of asking a student to show their student card to access or buy discounted or specialist services and products

• Builds upon eduGAIN to consume federated academic identities

• End users authenticate in the same way as to other federated services

• Provides merchants with a quick, easy, reliable and secure way to verify academic identities

• Reduces burden for Identity Providers and Federation Operators in onboarding service providers, especially the long tail

• It is privacy preserving and helps with GDPR compliance
What problems are we trying to solve?

• For many organisations offering simple services, joining R&E identity federations presents a barrier. Such organisations have difficulties to deal with complex and diverse environment in eduGAIN

• Identity federations need to invest effort to support them in order to make use of federated identity

• Enhance privacy by minimising the release of personal data to third parties

InAcademia deals with the complexity of the eduGAIN ecosystem and presents a unified interface to specific services
What opportunity does this bring?

• R&E Identity federations and eduGAIN established to support the R&E community
• Academic identity is now global and has a value to the non-R&E world
• This enabled commercial organisations (merchants) to build successful businesses from the value of the academic identity
• These companies make significant profit without contributing back to the community from which the capability comes
Target Audience

• Potential customers:
  • third-party merchants (service providers) outside the GÉANT community’s existing customer base who require only a simple ‘yes/no’ validation response
  • not marketed towards students, support services are only offered to the merchants themselves

• Such third parties could be either:
  • non-commercial (therefore, eligible to use the service free of charge), or
  • commercial/retail organisations (who would be charged to use the service)

To serve these markets we introduce two editions: 'commercial' and 'community'
1. Is this user a student?

2. Please authenticate with your university

3. IdP responds – Affiliation = student

4. Yes/No
InAcademia service architecture

Value Proposition for R&E Identity Federations

For Federation Operators InAcademia provides:

• a lighter weight option for Service Providers (SPs): entry-level, low-maintenance alternative using federated identity

• extends eduGAIN, adding value to the existing ecosystem

• incentive for identity providers to join eduGAIN

• reduction in support load: we take care of the administrative, technical and support burden of onboarding services

Leads to greater number & variety of services available to users
Value Proposition for Institutions

For Institutions InAcademia helps to:

• provide a **privacy preserving** way to prove affiliation
• **hassle free** for students
• **reduce GDPR risks** due to limited attribute release (‘Yes/No’ attribute)
• **add** value to the existing ecosystem
• **reduce support load**: we take care of the administrative, technical and support burden of onboarding services

Leads to greater number & variety of services available to users
Summary

• InAcademia is a service to validate whether an end user is affiliated with academia
• Has value for NRENs, Federation Operators, IdPs, SPs, and end users
• Two editions: Commercial and Community
• First the business pilot has been conducted on production grade infrastructure and did due diligence on business and legal requirements
• Proposed pricing and roll out strategy
• The service is currently operational in production
• Latest updates: French Federation (FER) joined (last week)
• Current member federations:
  • SURconext NL, DFN-AAI DE, WAYF DK, SIR ES, FER FR
