Rules of engagement

- This session is RECORDED, there will be a short write-up
- Please mute
- Ask questions in the chat:
 - we will try to answer as many as possible, given time and expertise
- We will have a Q&A at the end of this infoshare
- Ask questions later:
 - Visit the wiki pages: <https://wiki.geant.org/display/SIGISM/NIS-2+Directive>
 - Join SIG-ISM
 - Ask your CISO/Security officer/legal counselor
 - Ask your GEANT partner relations representative
 - Ask the GN5-1 WP8 security team
- GEANT Community Code of Conduct: <https://resources.geant.org/code-of-conduct/>

Agenda

14.00	Welcome and introduction	Alf Moens
14.05	Summary – Where are we now with NIS-2	Alf Moens
14.20	Restena and R&E in Luxembourg	Gilles Massen
14.30	NIS-2 Project at SURF	Jeroen Schuring / Alf Moens
14.40	NIS-2 in Hungary	János Mohácsi / Alf Moens
14.50	NIS-2 in Austria	Christian Panigl / Alf Moens
15.00	NIS-2 at GÉANT	Alf Moens
15.10	NIS-2 Position Paper	Stratix Consultancy
15.20	NIS-2 mapping on GÉANT Security Baseline	Šarūnas Grigaliūnas
15.40	Questions and Answers, discussion	
	Conclusions, Next steps and closing	
	What's next?	
	NIS-2 Infoshare V

4 | GEANT.ORG

Quick Summary

- **NIS-2 directive** has been published on 15th of December 2022, and will be in action within 21 months from the "entry in force"
- **October 2024:** latest, but with the Council Recommendation **to do it ASAP.**
- Standards are still 'negotiated' via comitology (delegated Act)
 - Expect „Rulings” or „guidance” from ENISA and NIS Cooperation Group
- Obligations are „logical”, no real surprises

4

5 | GEANT.ORG

The EU Security Union is complex and overlaps with the EU Digital priorities

The diagram illustrates the EU Security Union's complexity and its overlap with digital priorities. It is structured as follows:

- Central Hub:** The EU Security Strategy, supported by:
 - European Cybersecurity Industrial, Technology and Research Competence Centre and the Network of National Coordination Centres
 - Communication on Shipping Europe's Digital Future
 - EU Data Strategy
 - ERDF
- Sub-strategies:**
 - Building resilience through digital technologies
 - Ensuring digital security
 - Strengthening digital skills
 - Supporting digital innovation
 - Investing in digital infrastructure
 - Enhancing digital governance
 - Improving digital services
 - Strengthening digital resilience
 - Supporting digital security
 - Investing in digital skills
 - Enhancing digital security
- Legislative and Policy Frameworks:**
 - Digital Education Action Plan for 2021-2027
 - The European Education Area by 2025
 - A new European Research Area for Research and Innovation
 - ERDF, ERASMUS
- Infrastructure:** Includes AI, Cloud, Quantum, and other digital technologies.
- Rules:** Includes AI Act, CRA, DSA, DMA, Digital Rights, AI Liability Act, and Digital Rights.
- Rights:** Includes Security Union / Cybersecurity Strategy, Digital Strategy, Data Strategy, Industrial Policy, Research, and Product Labels.
- Funding:** Includes ERDF, ERASMUS, and other funding mechanisms.

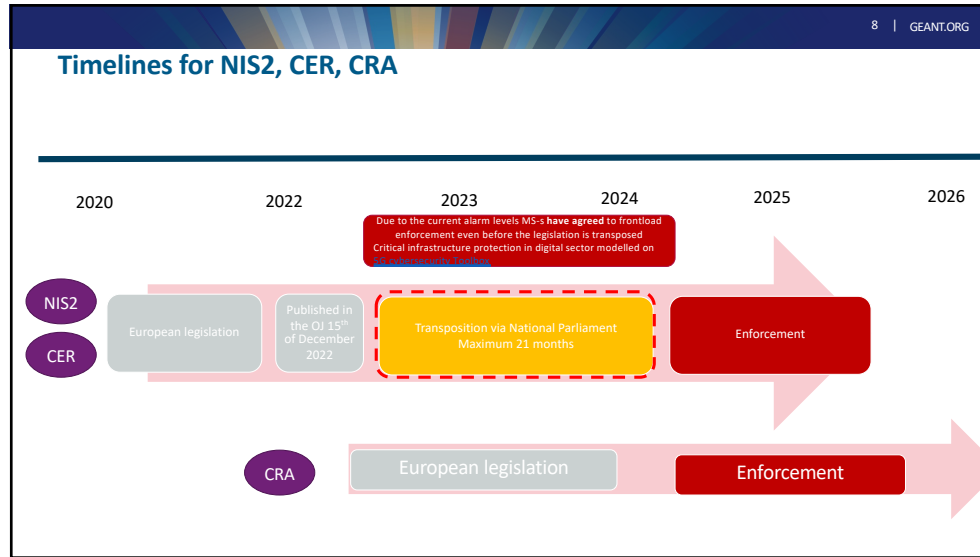

GEANT

5

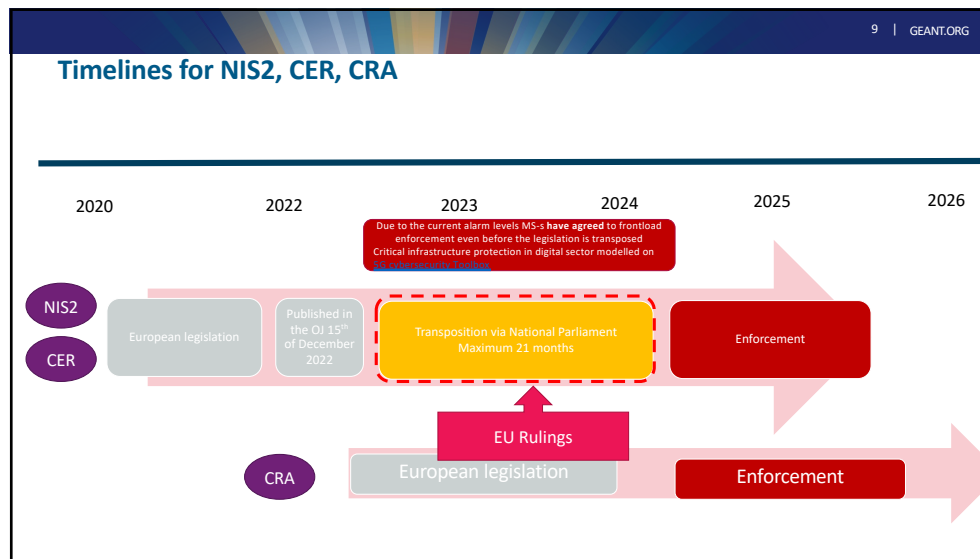

This collage illustrates the integration of digital technology into various aspects of modern life and infrastructure:

- Digital Commerce:** Amazon website showing a Kindle for \$79, with Prime membership benefits and movie recommendations.
- Smart Infrastructure:** A traffic light and smart speakers, representing the physical and digital layers of infrastructure.
- Mobile Technology:** A smartphone displaying various app icons, symbolizing digital services and connectivity.
- Automation:** A person using a self-checkout station, representing the application of digital technology in retail and services.
- Large-Scale Infrastructure:** A large stadium-like structure, possibly representing a venue for digital events or a hub for digital infrastructure.

7

8

9

10 | GEANT.ORG

National transposition: EU Member states decide individually on:

- National implementation
- Scope
- Standards
- Audit and Compliance structure
- National CSIRT structure

- Small or large organisation
- Governmental Agency
- Special "functions":
 - IX, DNS, tld
-

- Implementation coordination thru:
 - Rulings from EC
 - NIS Cooperation Group
 - ENISA

Legislative challenges to align with national law.

14

15 | GEANT.ORG

NIS-2 at SURF

- SURF appointed a project manager for NIS-2: Jeroen Schuring
- Clarify impact on R&E institutions, based on scenario's
- Clarify impact on SURF, based on scenario's
- Clarify impact on CSIRT function: part of SURF or independent?
- Propose governance structure for implementation of EU legislation for R&E

15

KIFÜ

NIS2 in Hungary – and relation to KIFÜ services

János Mohácsi, Head of International R&D, T&I service owner

21 June 2023

16

KIFÜ

KIFÜ – Hungarian e-infrastructure services

Legend:

- HIRONE+ Pápa
- terminal multiplexer
- ROADM
- LA
- HEC DF
- other DF
- managed lambda
- 3450/10000 Mbps

17

KIFÜ – Hungarian e-infrastructure services

NIIF Program since 1998

Member of NREN community since 1992

NIIFI + KIFU merger 2016

NETWORK technologies

Internet (1991), MPLS (2002), IPv6(2003), Segment routing (2013), 100 Gbps (2012)

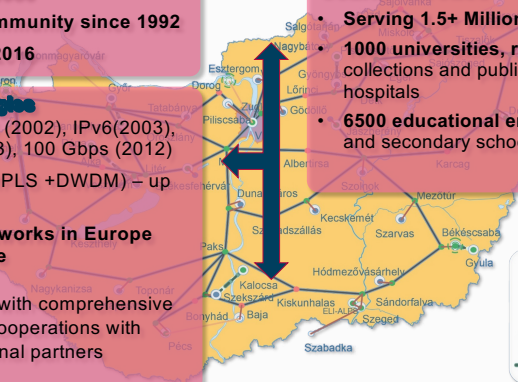

Hybrid network (IP/MPLS +DWDM) – up to 100 Gbps access

Reaching **44 R&E networks in Europe and 60+ in Worldwide**

Serving national R&E with comprehensive service portfolio and cooperations with national and international partners

USERS - ACCESS

- Serving **1.5+ Million PEOPLE**
- 1000 universities, research, public collections and public cultural institutions, hospitals**
- 6500 educational endpoints, all Primary and secondary schools**

KIFÜ

- HIBONE+ PoPs
- terminal multilevel
- ROADM
- ILA
- HEC DF
- other DF
- managed lambda
- 34/50/100/200 Mbit/s

KIFÜ NIS2 in Hungary – and KIFÜ services

- Hungary is focusing on Critical Entities Resilience Directive (CER) instead of NIS2 (CER and NIS2 directives entered in force January 16, 2023)
- CER – [EUR-Lex - 32021L2557 - EN - EUR-Lex \(europa.eu\)](#)
- CER legal harmonization – Ministry of Interior Affairs – members: telecommunication authority, Prime Minister’s Cabinet Office, Ministry of Foreign Affairs and Trade – rather closed discussion
 - Expected result – around end of 2023
- Digital infrastructure providers:

Providers of internet exchange points	
Publicly available recursive DNS resolution services, authoritative DNS server providers	KIFÜ
Top level DNS service providers and registries	KIFÜ
Cloud service providers	KIFÜ
Data centre service providers	KIFÜ
Content delivery network services – content providers	KIFÜ
Trust service provider	KIFÜ - brokered
Public internet providers	
Electronic communication service providers	KIFÜ
Managed service providers	
Managed Security Providers	

20

21

KIFÜ KIFÜ approach to implement NIS2

- **Planned preparation**
- Use GÉANT security baseline
- technical, operational and organizational measures against possible incidents
- risk analysis and regulation of the security of IT systems;
- incident management;
- business continuity, disaster recovery and crisis management plans;
- security of the supply chain
- security in the acquisition, development and maintenance of network and information systems – vulnerability management
- policies and procedures for evaluating the effectiveness of cybersecurity risk management measures;
- basic cyber hygiene practices and cyber security training;
- policies and procedures regarding the use of cryptography and, where applicable, encryption;
- human resources security, access control policies and asset management;
- use of multi-factor authentication, secure communication systems within the organization where appropriate.
- Work with our served organisations
- Strengthen cooperation with eduCSIRT.hu (KIFÜ) and other Hungarian CERT/CSIRTs
- **Research organisations?**
- **Work on ISO 27001 re-certification**

22

A Perspektive on NIS2 for e-Infrastructures in Austria

*Christian Panigl, Head of AConet & Vienna Internet eXchange @ UniVie
E-IRG Workshop, June 2023, Malmö*

23

24

ACOnet / VIX / UniVie Context

- **ACOnet** (the Austrian NREN)
 - is represented and operated by the University of Vienna (UniVie) IT department, as a „joint infrastructure“ together with other universities in Austria
 - dedicated division for ACOnet & VIX
- **VIX** (Vienna Internet eXchange)
 - is owned and operated by the University of Vienna
 - shared team for ACOnet & VIX operations (15 people in total)
 - is already an „essential service“ under NIS

2

24

25

ACOnet & UniVie context extended

- “Supplier” for nic.at GmbH (.at TLD Registry)
 - another team of 15 people for
 - SW development, .at registry & DNS operations
 - nic.at = ISO27k & NIS operator of essential service

therefore:

- ACOnet & VIX team “NIS(2)-ready”
- good communication channels with CERT.at and NIS authorities

3

25

26

ACOnet community

- ACOnet has >250 participants
 - universities and other HE institutions
 - research institutions (big and small)
 - museums, libraries, ...
 - but also (all) ministries and regional governments
 - and some healthcare institutions
- “some” NIS2 awareness
 - ArgeSecur community group (for HE)

4

26

27

Risks and Unknowns wrt NIS2

- National implementation details yet unclear
- Who will be designated essential / important?
- Effect on ACOnet POP locations & operators
- Additional costs!
- Effect on other e-Infras (e.g. VSC.ac.at)
- Supply chain regulations?
- Drain on resources
- Degraded work climate

35

36

NIS2 for NRENs
a Call to Action

36

37

37 | GEANT.ORG

STRATIX report - Summary

- No silver bullet
- Identify if you are in scope
- Compliant, try to minimize impact
- Use existing frameworks
- Engage with your authorities

- NIS2 will not go away: Find a balance between binary tech thinking and nuanced regulatory reasoning

37

38 | GEANT.ORG

STRATIX report - Considerations

- Many services are in scope
- Part of a patchwork of regulations: NIS2, CER, CRA, GDPR
- Impact outside of EU(27)
- CSIRT network will change
- Supply Chain effects

Stratix

38

39 | GEANT.ORG

STRATIX report – Solutions to Consider

- Reshuffle services in the organisation
- Sector specific regulations may intervene
- Halt services or buy services
- Catalyst for change
- Choose a framework that fits you best
- Start with a risk-based analysis

Stratix

39

40 | GEANT.ORG

STRATIX report - Recommendations

- Accept that the world has changed
- Implement a framework
- Work together in the GÉANT network
- Work together with your clients
- Talk to your government

Stratix

43 | GEANT.ORG

GÉANT Security Baseline

1 - Baseline
Maturity level 1 matches the title of this framework and defines the so-called "GÉANT Security Baseline". This level defines a GÉANT wide minimum of security and is expected to be met by most NRENs by default and implemented by all NRENs in the short term. This level mainly contains basic requirements that form the basis for an effective security program in an organisation. NRENs should ensure compliance with this level and implement missing requirements as quickly as possible.

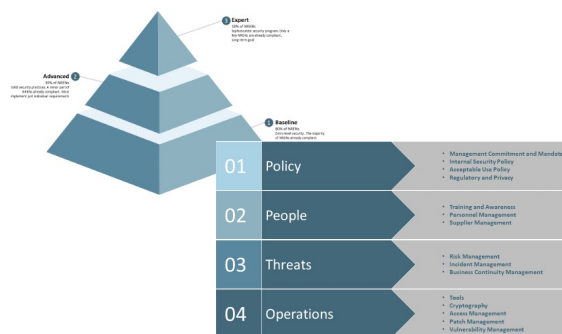

Scope: minimum requirements for each organisation

2 - Advanced
Maturity level 2 builds directly on the baseline requirements and extends the modules mainly with organisation-specific adaptations. This level defines modules of a mature security program and provides a good foundation for security management. It represents the medium to long-term goal for NRENs to achieve in order to solidly establish and improve security management. It is expected that most NRENs are partly compliant by implementing just individual requirements and the percentage of fully compliant organisations will grow steady.

Scope: medium to large organisations or such that offer important services or providing access to research collaborations.

3 - Expert
Maturity level 3 is the highest level and requires a deep understanding of security management and security program. It is expected that only a small part of NRENs will reach this level in the near future. Depending on the services offered, the business cases supported and the risk assessment of your own organisation, some or all of the criteria from this level may be relevant. It is designed as a long term strategic goal for NRENs.

Scope: organisations processing sensitive and critical information or providing critical services and infrastructure

01	Policy	<ul style="list-style-type: none"> Management Commitment and Mandate Internal Security Policy Acceptable Use Policy Regulatory and Privacy
02	People	<ul style="list-style-type: none"> Training and Awareness Personnel Management Supplier Management
03	Threats	<ul style="list-style-type: none"> Risk Management Incident Management Business Continuity Management
04	Operations	<ul style="list-style-type: none"> Tools Cryptography Asset Management Patch Management Vulnerability Management
