Welcome to the wiki pages of the GÉANT Trust and Identity Incubator!

The T&I Incubator (GN5.1 WP5 T2) aims to develop, foster and mature new ideas in the Trust and Identity space in Research and Education. The incubator will investigate new technologies that currently have no place (yet) in the services ecosystem of the GÉANT project. This may include to test and experiment with potential new features for existing GÉANT services. In addition also business case development for potential new services and developments that would improve data protection and privacy aspects in services or software are in scope.

A few quick pointers:

- The **INCUBATOR DASHBOARD** will give you an overview of all past and current work (GÉANT 4.3 and GÉANT 5.1 Project)
- The **SPRINT DEMO** page showcases the result of recent work as presented at the public sprint demo’s
- Please go to the **CALL FOR IDEAS** to provide us with suggestions for topics we should be engaging with
