

# eduGAIN Votes

Decisions of the eSG are determined by a simple majority of Member Federations from the active list at the time of the call to vote, apart from constitutional changes. Member Federations may vote on all constitutional changes and new Technology Profiles but may only vote on changes to Technical Profiles in active use within their federations. Each Member Federation's vote is equal, and each Member Federation is initially regarded as active. A Member Federation which is absent from two consecutive votes will be removed from the active list for the purpose of subsequent votes. Participating in a vote returns the federation to the active list. Voting takes place over two weeks, but a decision may be reached early if the required majority is achieved before that time.
