

# Task 3: Next Generation Trust and Identity Technology Development - TrustTech

- [Key objectives](#)
- [Deliverables and Milestones](#)

**Duration: 1 May 2016 - 31 December 2018**

This Task integrates developments that go beyond or significantly disrupt the current models, technologies or approaches to trust and identity that are in operation in the eduGAIN platform.

It aims to widen the engagement of federated identity approaches to other sectors, including e-Government and potential social identity providers, allowing greater engagement by individuals and citizen scientists in research.

## Key objectives

The key objectives of this task where

**T3.1A** [Carry out development based on OpenID Connect \(OIDC\)](#), specifically for extending the standard to make OIDC "federation and interfederation capable"

**T3.1B** [Develop user-centric identity federation](#)

**T3.2** [Two-factor authentication in eduGAIN](#)

**T3.3** [Services to support mobile federated identity](#)

**T3.4** [Cross-sector interoperability \(eduGAIN\)](#)

## Deliverables and Milestones

DONE

[Deliverable D9.3: Best Practice for User Centric Federated Identity](#)

DONE

[Milestone M9.8: Support of OIDC in Shibboleth](#)
