

AARC2-JRA1.2B -- OIDC-based services in research collaborations

Requirements and guidelines for federated access to OIDC-based services in the context of research collaboration

Summary

Capture what OIDC-based services need to understand, which schemes to follow in order to benefit from federated identities, that currently are exclusively in the SAML world.

This will probably include pointers to documents that specify mappings between SAML and OIDC expression of attributes, entitlements or claims.

There is some overlap with [AARC2-JRA1.3.B "Guidelines for registering OIDC Relying Parties in AAls for international research collaboration"](#)
