

20160316-18: Fibre wash workshop

This visit to SUNET's fibre wash team is organised for participants in the TF-CPR meeting hosted by SUNET in Stockholm, [Sweden, 16-18 March 2016](#).

With a microscope we examine how debris affects fibre optic connectors and see why washing is important and how it saves money.

Meet our 'guide'

"Network architect and chaosmonkey for AS1653 and AS2603. Part of the Network Planning & Engineering team and works with everything from physical planning to logical planning and strategy. My personal specialities are routing, interconnect strategy, peering, optical things, innovation, and network automation."
