

NGI_Trust publishes catalogue of 56 funded projects

Since January 2019, the [NGI_Trust project](#) ran three rounds of [open calls](#), funding **56 projects** in the field of privacy and trust enhancing technologies.

Now that the projects from the third and final open call have been selected, the NGI_Trust team grouped them into **12 thematic areas** and published a comprehensive catalogue.

Discover all the projects here: <https://wiki.geant.org/display/NGITrust/Funded+Projects>

In the next period, the NGI_Trust consortium will continue to provide technical coaching, intellectual property and business mentoring support to the funded projects.

About NGI_Trust

The NGI_Trust project supports the development of a human-centric Internet by developing a stronger European ecosystem of researchers, innovators and technology developers in the field of privacy and trust enhancing technologies. Project partners include the [European Future Innovation System \(EFIS\) Centre](#), the [European Business & Innovation Centre Network \(EBN\)](#), [Kantara Initiative Europe](#), [GÉANT](#), [Fraunhofer IAO](#) and [Fundacion Tecnalia Research & Innovation](#).
