As reported in the eduGAIN Town Hall of December 2015, since GN4-2 began in May 2016, the GÉANT project has made a split between operations and development for services. It is neccessary to setup up this new structure, establish basis systems and outline plans and breakdown of work between the two areas of the project.

This is the draft of document that defines the organisation of eduGAIN service management through GÉANT project, in aspects of developing and operating eduGAIN service. eduGAIN SG have been asked to review this document and provide its input till late August/ beginning of September.

NOTE - The work on this draft is still in progress
