eduGAIN Reporting - Access

eduGAIN Reporting offers two types of reports and statistical data about eduGAIN:

- global eduGAIN: that comprehends eduGAIN Overview, Issue Overview and Warning and Errors.
- federation specific: federation statistics and comparative metrics.

Access to global statistics is open to everyone without the need to authenticate. Global statistics comprehend eduGAIN Overview, Issue Overview and Warning and Errors.

Access to federation specific statistics and comparative metrics is granted to eduGAIN delegates, eduGAIN deputies and federation operators of the selected federation. eduGAIN Reporting relies on the eduTEAMS's eduGAIN Virtual Organization to grant access to entitled users.

Please follow the eduGAIN Virtual Organization enrollment procedure in order to register your eduGAIN delegates, deputies and federation operators.
