NGI_Trust

NGI TRUST

The NGI_Trust project supports the development of a human-centric Internet by developing a stronger European ecosystem of researchers, innovators and technology developers in the field of privacy and trust enhancing technologies.

From January 2019 to May 2020, NGI_TRUST ran three rounds of open calls in order to select and providing financial support to the best projects submitted by third parties in a competitive manner.

57 projects have now been selected and the NGI_Trust consortium is now providing technical coaching, intellectual property and business mentoring support to the funded projects.

A short-presentation of NGI TRUST is available here.

About us

The partnership for innovative technological solutions to ensure privacy and enhance trust for the human-centric Internet.

Partners:

European Future Innovation System (EFIS) Centre

European Business & Innovation Centre Network (EBN)
