

How to set up an Identity Provider for eduGAIN

What is: an [Identity Provider](#), a [Home Organization](#), the [Identity Management](#) process.

For Identity Provider administrators:

- [IDP Metadata Profile](#) (metadata template, metadata validators)
- [IDP Attribute Profile: recommended attributes](#)
- [IDP Attribute Profile: unique identifiers IDP Attribute Release](#)
- [Relying Party Configuration](#) (MetadataProvider, federation-specific)
- [How an IdP can support eduGAIN SAML 2.0 WebSSO Profile](#)
- [How to test an eduGAIN Identity Provider](#)

Online Trainings for IdP administrators

To get a better understanding of attribute release, have a look at the [GÉANT online course on "Successful Attribute Release"](#).

If you care about security and incident management, attend the [GÉANT online course on "Why SIRTfI?"](#).
