

How to set up a Service Provider for eduGAIN

For Service Provider administrators

- [How to offer a service in eduGAIN](#) provides a general overview about the aspects relevant for adding a service to eduGAIN. This is a good preparation for the following guide, which goes more into more detail.
- [How to join eduGAIN as Service Provider](#) includes more concrete step-by-step instructions on what has to be done to legally and technically add a service to eduGAIN

If you are interested to see which services are already eduGAIN-enabled, have a look at the [eduGAIN Services](#) page.

Specific Topics

The following topics are advanced topic that are also relevant when adding a service to eduGAIN.

- [How to retrieve interfederation metadata](#)
- [How to configure the login button](#)
- [How to compose SP SAML2 metadata](#)
- [How to choose the attributes to request and how to get them](#)
- [How to choose the user's identifier](#)
