

Free IPv6 wireless network

There is a wireless network being broadcasted in our office that is called

terena.org/ipv6only

This network is open for everyone and offers free IPv6-only access to the internet.

Some characteristics:

- IP addresses are in the range 2001:610:148:b0b0::/64
- IPv6 connectivity is native
- IPv4 sites can be reached by use of NAT64. This service is delivered by [Tayga](#).
- If your computer cannot use DHCPv6, manually configure it to use **2001:610:148:cafe::2** as the resolving name server.

Please report any issues to sysadmin@terena.org
