## Raised Topics

- TF-EMC2 needs a ToR, help me write it (Brook)
- Location, location, location (Brook)
- 1-Click™ Enablement of Service Provider (Klaas)
- OpenID Connect, should be fear or embrace it (Ajay)
- What is the "organisation" for a virtualised identity provider (Montonori)
- Office 365 and Rich Client Support in a federated environment, solved by proxies, can this scale to solve other problems (Joost)
- Attribute Options, where to dump this in SAML (Peter)
- Id as a Service, what's your experience (Roland vRW)
- Discovery Service, can we have 1 thing that is globally usable (Milan)
- Account Linking (Ken)
- Identity Linking (Lalla)
- "Standard" attribute translation from Grid to Federation, then back again (Lalla)
- As an SP, what's the business case for an attributeless IdP (Niels)
- How are we going to scale interfederation globally, with the pieces we have (Niels)
- Attributes as 1st class citizens (Victoriano)
- Attributes on attributes (Roland vRW)

## Successful Topics

- Attributes (Merged Topics)
  - Attribute Options, where to dump this in SAML (Peter)
  - Attributes as 1st class citizens (Victoriano)
  - Attributes on attributes (Roland vRW)
- Office 365 and Rich Client Support in a federated environment, solved by proxies, can this scale to solve other problems (Joost)
- OpenID Connect, should be fear or embrace it (Ajay)
- Discovery Service, can we have 1 thing that is globally usable (Milan)
- Linking (Merged Topics)
  - Identity Linking (Lalla)
  - Account Linking (Ken)
- How are we going to scale interfederation globally, with the pieces we have (Niels)

## Rejected Topics

- TF-EMC2 needs a ToR, help me write it (Brook)
- Location, location, location (Brook)
- 1-Click™ Enablement of Service Provider (Klaas)
- Id as a Service, what's your experience (Roland vRW)
- "Standard" attribute translation from Grid to Federation, then back again (Lalla)
- As an SP, what's the business case for an attributeless IdP (Niels)
- What is the "organisation" for a virtualised identity provider (Montonori)

## Discussion on attributes

Roland presented some use-cases that would require attributes being collected from different sources.

In some of the use-cases the IdP acts as a broker collecting attributes from different sources, whereas in some other scenarios the SP contact the IdP and the trusted AA to collect the attributes.
