

# Release 1.1 - Nov 1, 2017

eduTEAMS is a suite of services that aid collaborative and/or virtual organizations in operating a federated Authentication and Authorization Infrastructure.

The 1.1 release, available from Nov 1, 2017, contains the following features and changes:

## eduTEAMS Discovery Service (DS)

- The eduTEAMS Discovery Service is now available for public use.
- eduTEAMS DS can be used by services in eduGAIN to handle discovery (WAYF) of home institution identity providers in eduGAIN.
- The service features both a hosted (non-javascript) as well as an embedded version and allows services to filter the identity providers available to users specifically for their service in an easy and straightforward way.
- For more information on the service and how to start using it, please visit the [DSX Discovery Service \(Pilot\)](#) home.

## eduTEAMS Membership Management Service (MMS)

- Major update of MMS user interface
- Introduction of myprofile page with features a comprehensive overview of an end users personal data registered in MMS and the services that may consume it.  
See <https://registry.eduteams.org/myprofile> for details
- The [privacy policy](#) for eduTEAMS MMS was updated to reflect the introduction of the myprofile page
- eduTEAMS MMS is now fully compliant with the [eduGAIN Data protection Code of Conduct](#)
- Resolves a number of bugs and issues of the 1.0 release
- For more information on the service and how to start using it, please visit the [Membership Management Service](#) home.

eduTEAMS MMS is currently available for pilots with institutions and collaborations of NRENs participating in the GEANT project. To request a pilot with eduTEAMS MMS, please contact us at [support@eduteams.org](mailto:support@eduteams.org)
